General Overview

Background

- **CoME initial aim was to address the weaknesses identified in MyGuardian.**
- **Based in MyGuardian Improvements report (D24), main recommendations were:**
 - Use of wearable devices
 - Integration with formal caregivers 24/7 support
 - Multi-platform app
- **MyGuardian was only focused on MCI seniors and the management of their close circle. Main functionalities were:**
 - Close circle management
 - Care task distribution among close circle
 - Alerts based on safe zone and alerts tracking
 - Safe zones
 - Senior could contact close circle by calling

CoME vs MyGuardian

- CoME wants to focus on the MCI prevention and detection, so the whole circle around the disease could be covered. -> Self-management
- CoME wants to integrate the full support of formal caregivers 24/7 (not only close circle ones)
- CoME wants to add missing functionalities to informal caregivers like information on how to manage MCI people (tutorials) and support them with occasional caregivers.

CoME Scope

The aim of CoME is:

- **For seniors:**
 - MCI prevention
 - Detection and proactively acting upon the risk of development MCI
 - Health self-management
 - Healthier lifestyle -> By means of goals tracking, wearable devices, self-reports and avatar coach.
 - Fully support of formal caregivers on senior healthy habits

- **For Informal caregivers:**
 - Access to reports about healthy habits of senior
 - Access to information about risk of MCI development
 - Encouragement of Seniors behavior change

CoME Scope

- **For Formal Caregivers:**
 - Became a part of the platform
 - They act in the back-end reviewing goals established and providing recommendations based on the senior profile.
 - Analyze MCI risk alerts provided by the platform and evaluate them providing recommendations to senior and informal caregivers.

CoME Complete the MCI circle

CoME (pre-MCI or early MCI)

- Focused on the self-management of healthier seniors' lifestyle
- Early detection of MCI risk through user state assessment based on:
 - Wearable
 - Self-reports
 - Games
 - User interaction with the devices
- Also helps MCI people to manage their goals and to manage ADL routines

MyGuardian (MCI) -> Now hallozorg

- Focused on supporting MCI people.
- Focused on managing close circle and distribute caregiving tasks
- Provide close circle communication channel
